Not a problem. We typically will scan patented files that are involved in an interference because there is usually increased public interest in the file. And besides, we trust Maria to send only those files that need to be scanned!

Tammy~

I did speak with Maria and informed her of our policies for scanning patented files but she explained the circumstances on this one. I told her I thought it would be okay but I wanted to run it past you first. It should be okay to except this one for scanning?

*Thank you*

Gloria, per our conversation, I would like to have the above patent file scanned into IFW because it's involved in an interference and someone from the public has been requesting to see it for several months. The Board doesn't release files when they are in an interference and it could be quite some time before the interference case is finalized. Is there a way for me to have the patented case scanned in and made public?

Thanks for your assistance.
